

Stagecoach Christmas Tree

Celebrate Christmas with Stagecoach with this fun project you can make at home

You will need

- Scissors
- Glue or tape
- Printed templates
- Cardboard Box

1. Glue 6x tree templates to pieces of cardboard.

2. Cut around the outside of each tree as shown.

3. Fold each cardboard tree shape in half as shown

4. Attach double sided tape or glue to the left half of one cardboard tree shape and also to the right half of another cardboard tree shape.

5. Stick the glued halves of Tree shape 1 and Tree shape 2 together. Repeat this with all of the tree shapes you've prepared until you run out, and then stick the last tree half you attached to first the tree half you started with.

6. Next you can use the decorations template provided to decorate your tree. We printed a few copies of these to decorate the top and each branch. Carefully cut around each shape as shown.

7. We glued these to the tree on each of its six sides as shown.
